SUMMARY:

Product-focused software engineer and blockchain security expert with experience spanning full-stack development, smart contract auditing, and product leadership. Currently VP of Product at Cyberscope, leading the strategy and execution of SaaS platforms and security tools. Strong background in Next.js, Node.js, TypeScript, PostgreSQL, and Solidity, with a proven ability to align technical solutions with business goals.

PROFESSIONAL SKILLS:

- Full-stack development with Next.js, Node.js, TypeScript, and MongoDB/PostgreSQL
 - Smart contract auditing and vulnerability analysis (Solidity, EVM)
 - Blockchain security best practices and Web3 compliance
 - Product strategy, roadmap planning, and cross-functional team leadership
 - Adept at translating complex technical concepts into clear, actionable plans for both technical and non-technical users.
-

WORK EXPERIENCE:

Vice President of Product

Cyberscope, Ioannina, Greece | June 2025 - Present

- Lead the product strategy and roadmap for Cyberscope's blockchain security tools and SaaS platforms, aligning development efforts with customer and market needs.
- Manage cross-functional teams across engineering, auditing, and design to deliver scalable, secure, and user-focused solutions.
- Drive vision, prioritization, and execution of product features, contributing to significant growth and operational efficiency.

Software Engineer

Cyberscope, Ioannina, Greece | November 2022 - May 2025

- Built and maintained critical features for Cyberscope's core web platform using Next.js, Node.js, and MongoDB, ensuring performance, security, and scalability.
 - Conducted smart contract audits for DeFi and NFT projects, identifying and mitigating high-impact vulnerabilities in Solidity-based contracts.
 - Collaborated closely with auditors and developers to enhance Cyberscope's internal auditing tools and processes.
-

EDUCATION:

Bachelor's Degree in Management - September 2010 - May 2014

Anytown University, Anytown, USA
